Mineral Compounds for Industrial Applications

With more than 40 years of experience in the sector, we have the professionalism, efficiency and knowledge that makes us in the sector, as well as a centralized organizational culture. This culture, created and developed over all these years, allows us a quick and accurate response to our customers, both as well as each of the employees.

Our Solutions

▶ Watch Video

Sustainability

minimize waste, reduce our carbon footprint, and support initiatives that promote environmental stewardship and social responsibility.

Collaboration

we leverage the collective expertise and knowledge within our organization to achieve common goals and drive success.

Innovation

Innovation drives our continuous growth and adaptation in a rapidly changing sector.

WHY CHOOSE US

Our Material Solutions

We pride ourselves on offering high-quality materials that meet the diverse needs of our clients across various sectors. Our centralized organizational culture ensures efficient and accurate responses to customer requirements, enabling us to deliver tailored solutions swiftly. By continuously innovating and adapting to market trends, we provide materials that not only fulfill current demands but also anticipate future needs, ensuring our clients always stay ahead in their respective fields.

Pharma

The highest standards of safety and efficacy for the pharmaceutical industry.

Cosmetics

High-quality materials that enhance the performance and appeal of cosmetic products.

Food Industry

Our materials meet stringent regulatory standards, ensuring safety and quality for the food industry. sector.

Nutraceuticals

We deliver premium materials that support the development of effective and safe nutritional products. lines.

Specialty Minerals

As a global provider of minerals and ingredients for the Pharma and Food industries, we rely on our extensive experience to select the highest quality ingredients complying with the most stringent regulations and standards. We ensure added value to our customers at every stage of the supply chain, providing tailormade solutions, custom formulations and assistance with regulations and product registration.

Our Solutions

Top Quality Ingredients

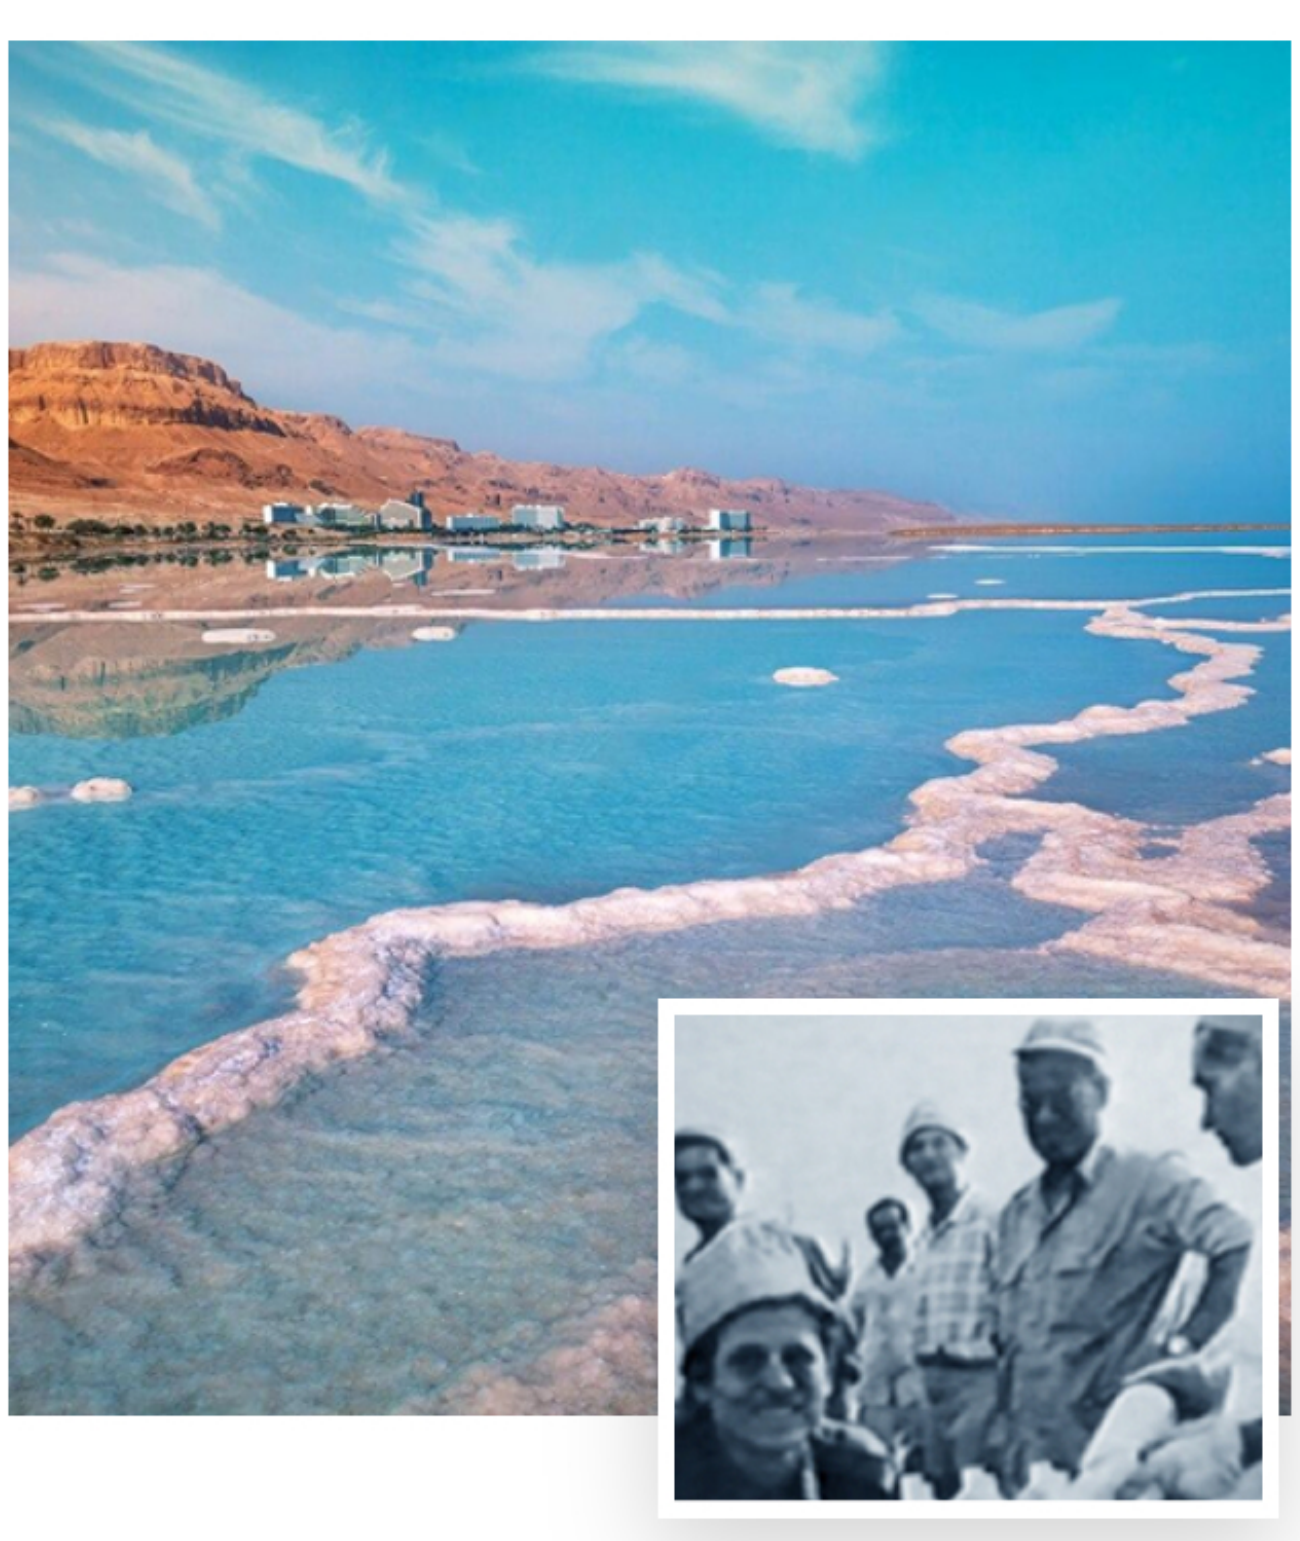
Our product portfolio consists of magnesium compounds, potassium chloride, calcium carbonate, aluminium hydroxide and sodium chloride.

Regulatory Support

We advise on national and regional regulations worldwide, supporting our customers during the product registration process for Food & Pharma ingredients.

Custom Formulation Development

Our team develops special formulations and devises innovative solutions to meet our clients' diverse needs.



WHO WE ARE

Dead Sea: the ideal origin of minerals

Israel's Dead Sea is the saltiest natural lake in the world. This characteristic makes it a unique source of dissolved mineral mixture. -Its waters have a high concentration of rich minerals, mainly calcium, magnesium, potassium and bromine. The extraction of these minerals occurs through a natural process through solar evaporation. The extracted minerals contain a particularly low content of heavy metals and are free of animal contamination.

Connect with Our Specialists

Are you looking for a bespoke formula tailored precisely to your requirements?

Our team of experts is create the exact formula for you and create a custom solutions to meet your unique needs. Whether you need a specialized product or a comprehensive consultation, we're ready to assist you.

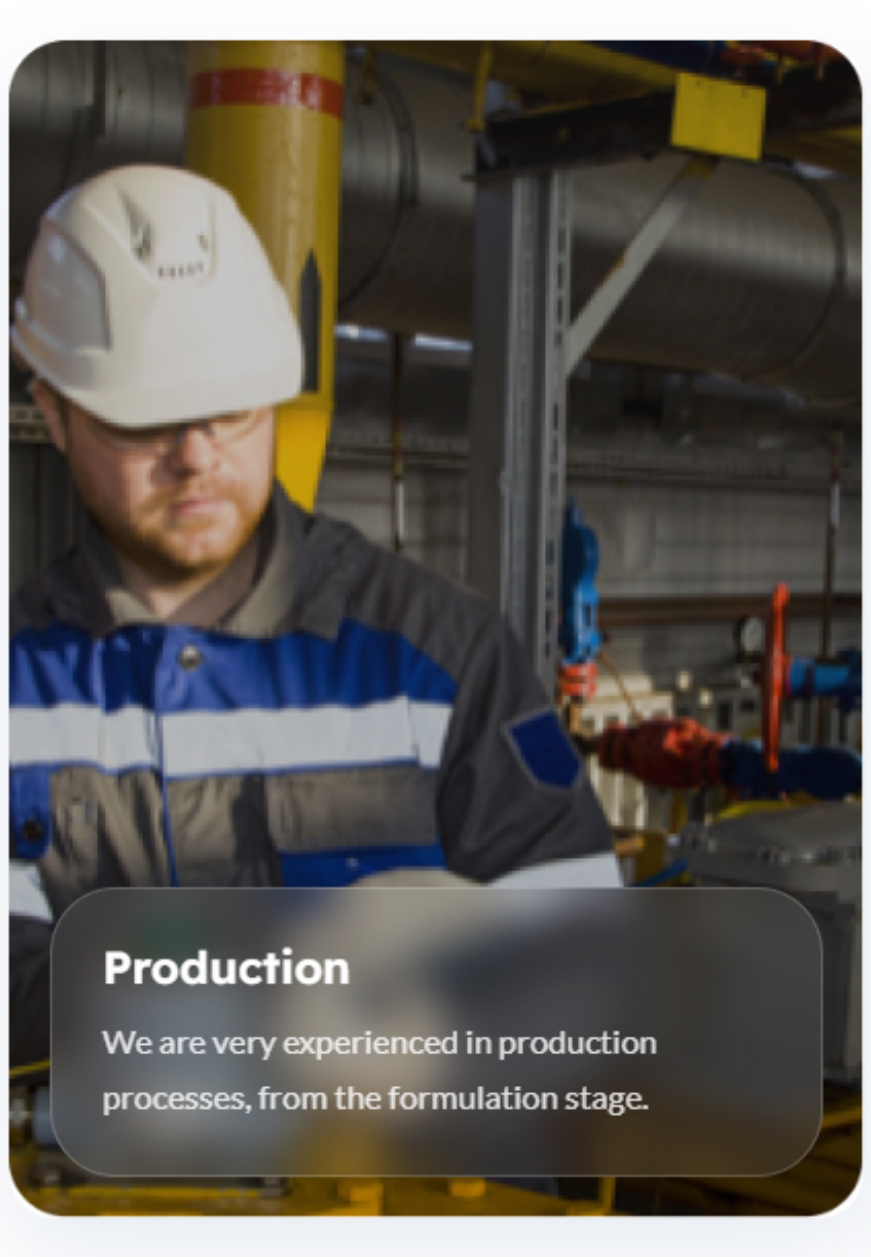
Get in Touch

BUSINESS UNITS

Production, Operations and Services

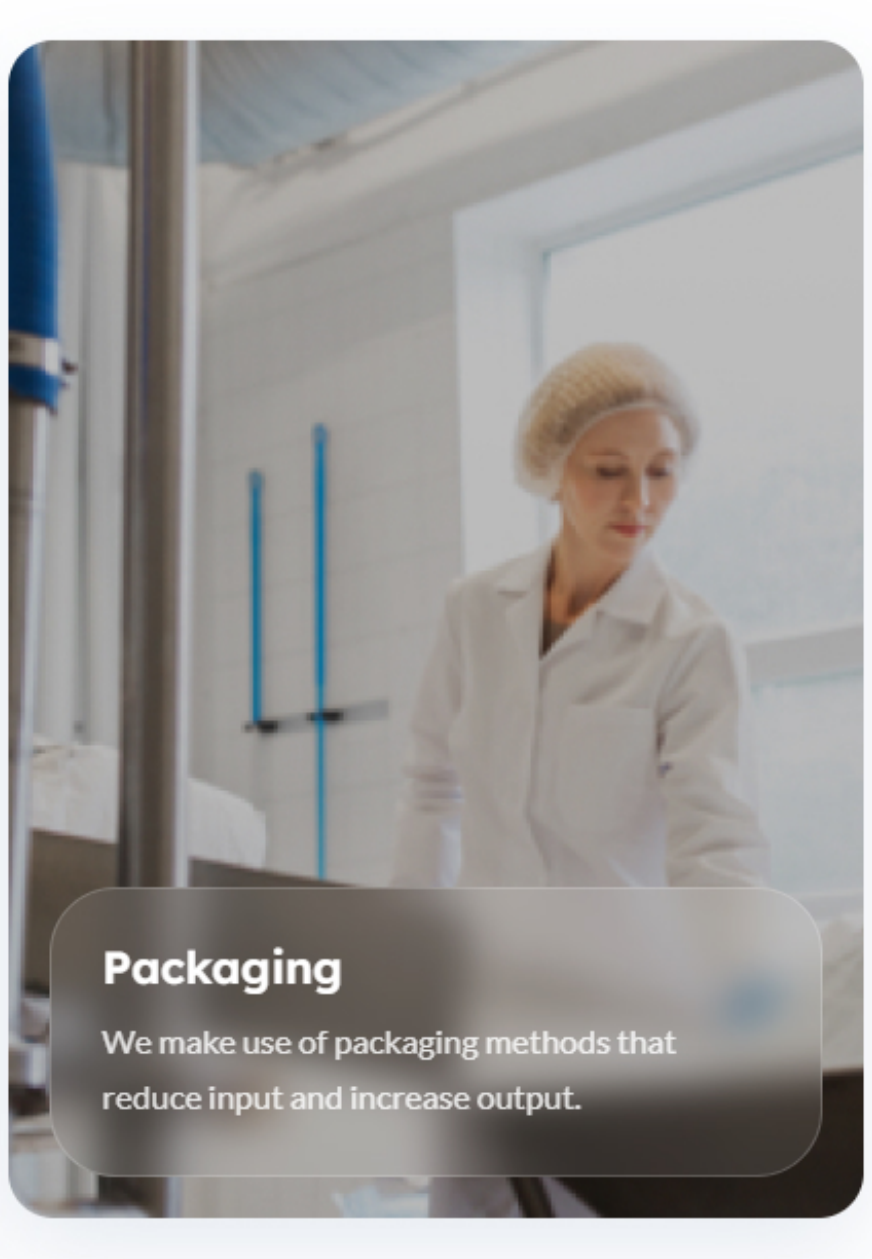
Our operations cover manufacturing and post-manufacturing processes, including quality control, installation maintenance, complex packaging, and logistics preparation.

Get Started



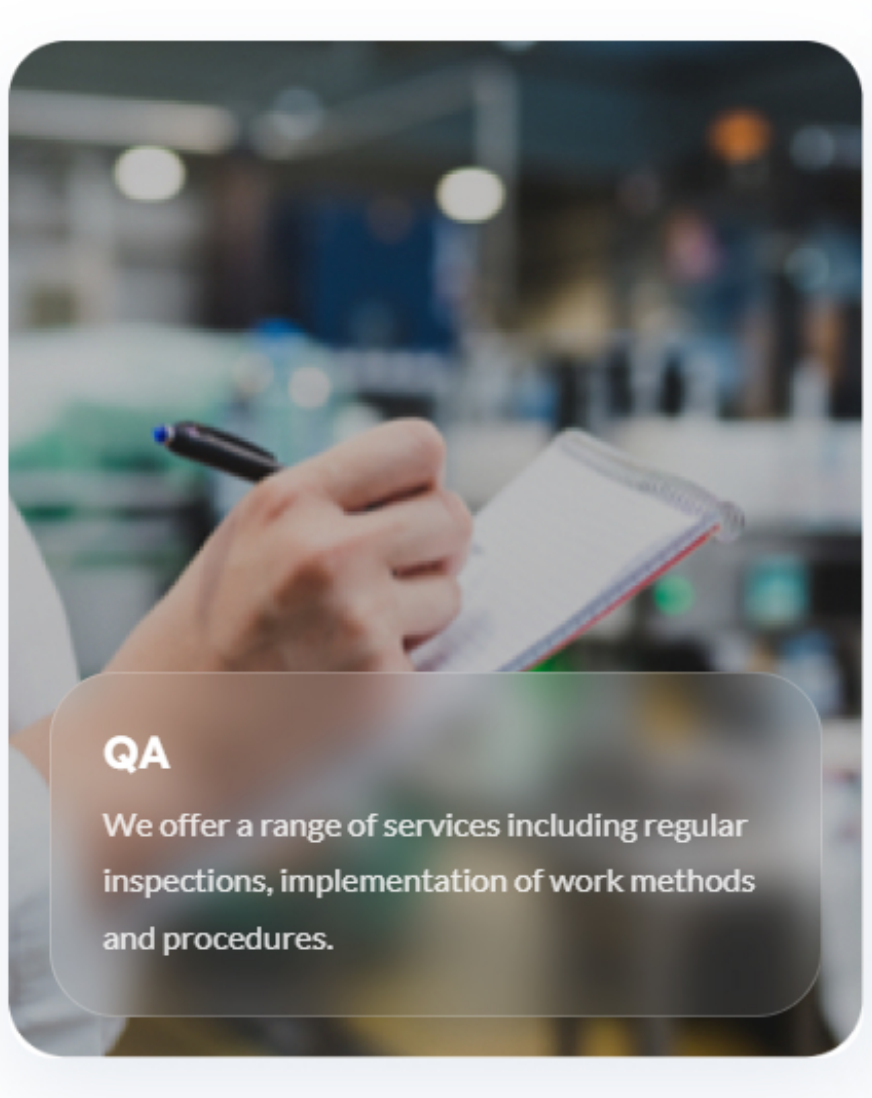
Production

We are very experienced in production processes, from the formulation stage.



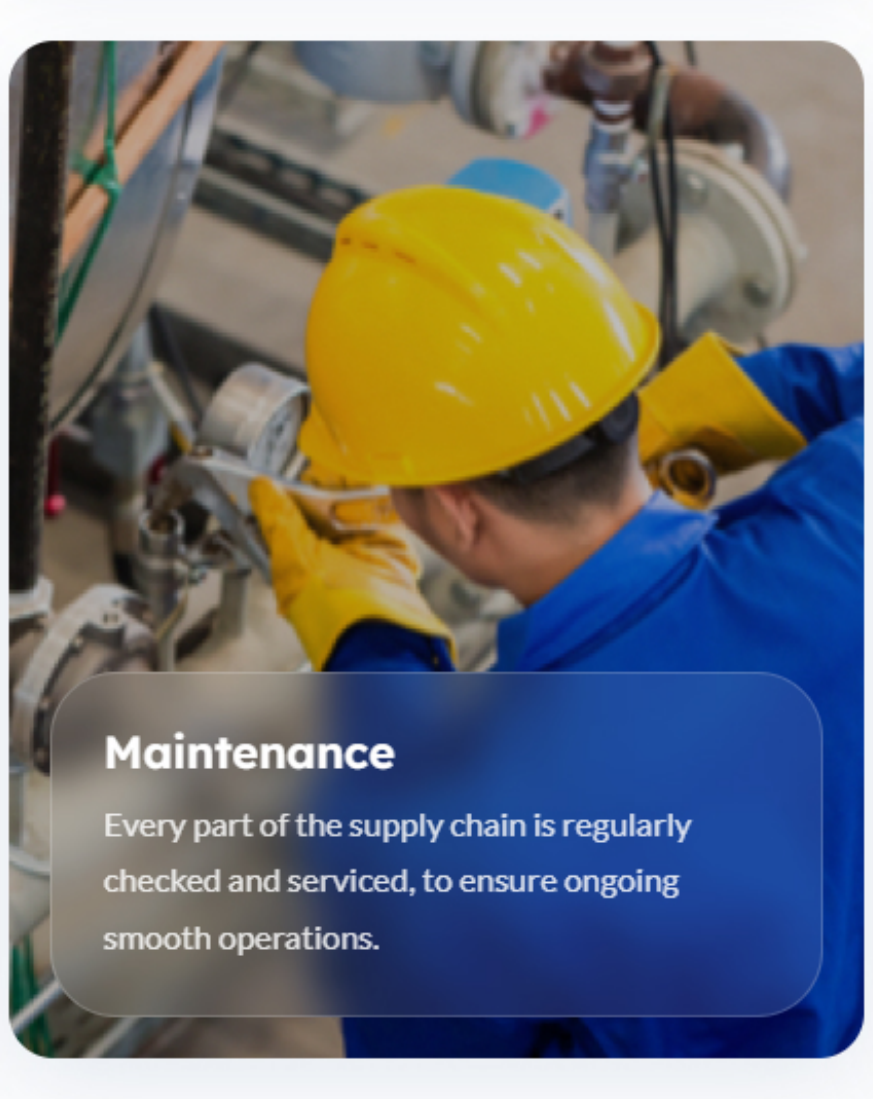
Packaging

We make use of packaging methods that reduce input and increase output.



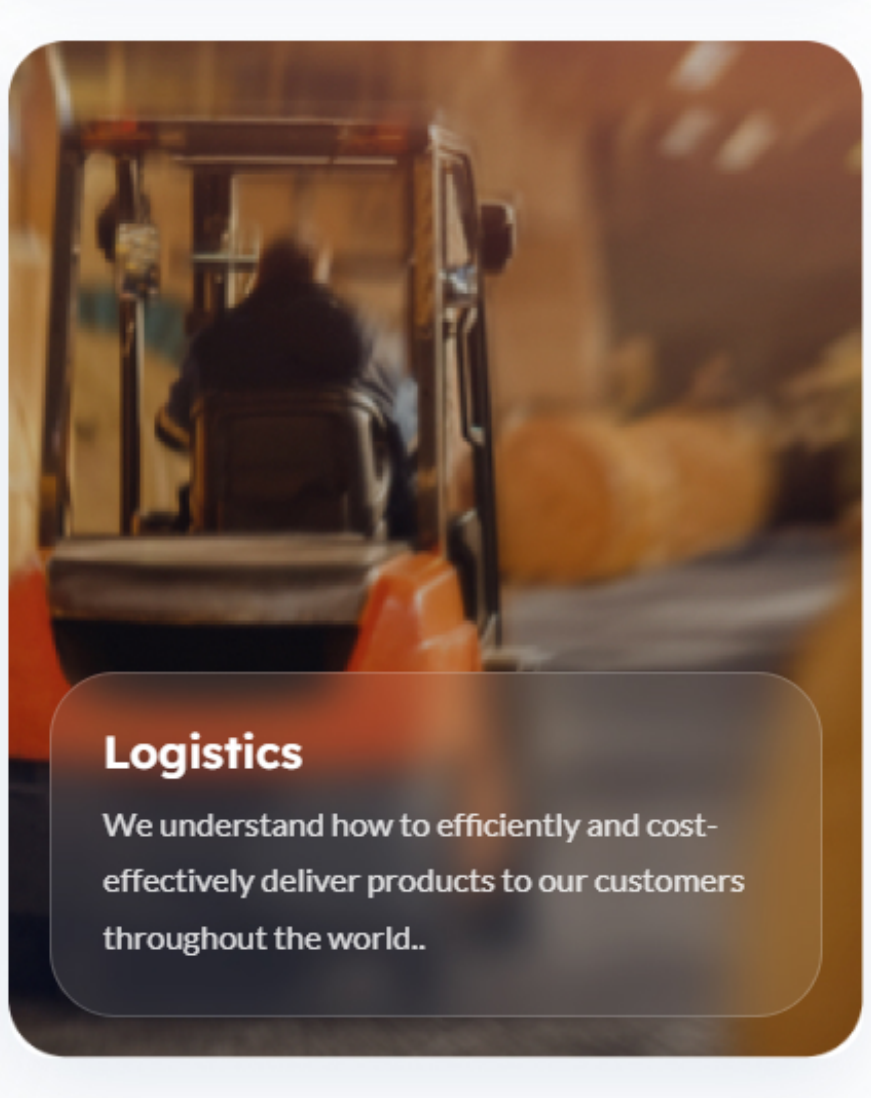
QA

We offer a range of services including regular inspections, implementation of work methods and procedures.



Maintenance

Every part of the supply chain is regularly checked and serviced, to ensure ongoing smooth operations.



Logistics

We understand how to efficiently and cost-effectively deliver products to our customers throughout the world..

MDCL - Dead Sea Minerals

Our Regulatory Guidance

Understanding the regulatory requirements of raw materials can be challenging. That's why it's important to choose a raw material supplier that has extensive experience and regularly interacts with major international regulatory authorities to stay up to date on the global requirements.

Our Solutions

MDCL

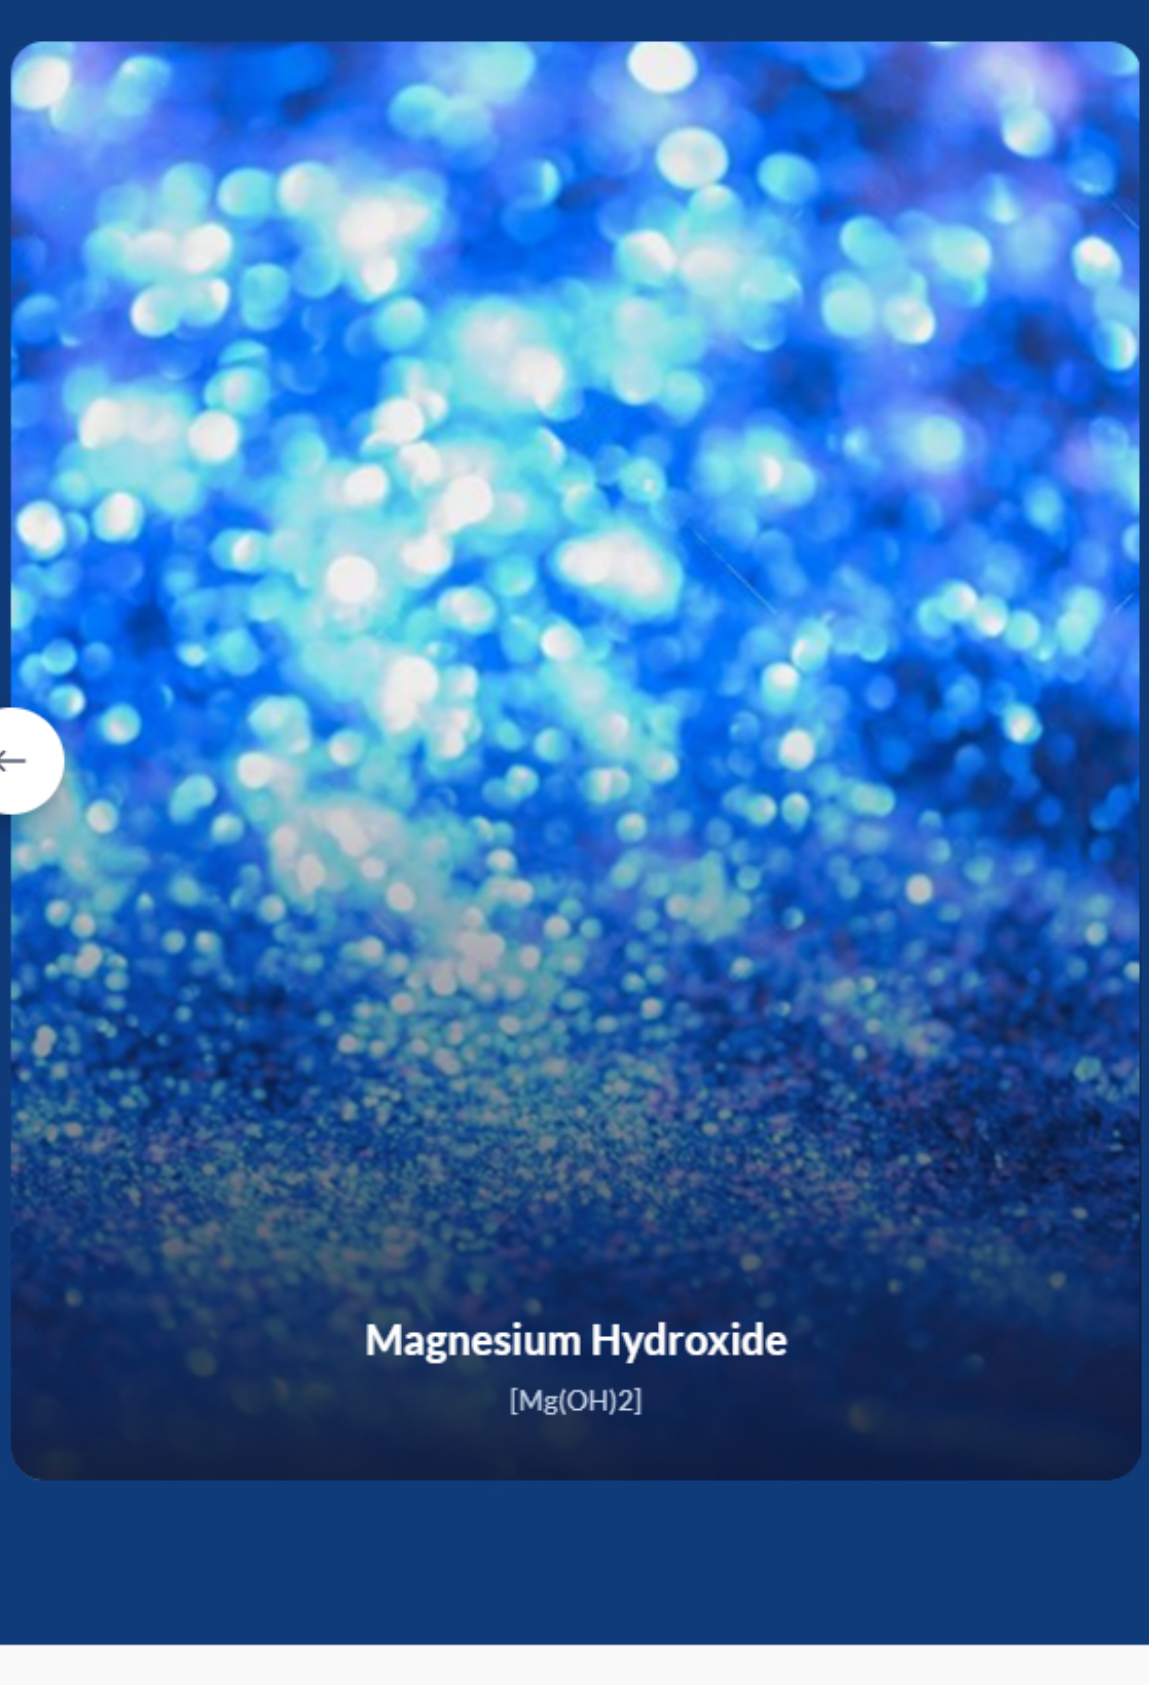
Most of our products carry the following certifications:

GMP
HACCP CERTIFIED
GMP+
FDA
USP
EUROPEAN PHARMACOPOEIA EP
FCC

Mdcl - Dead sea minerals

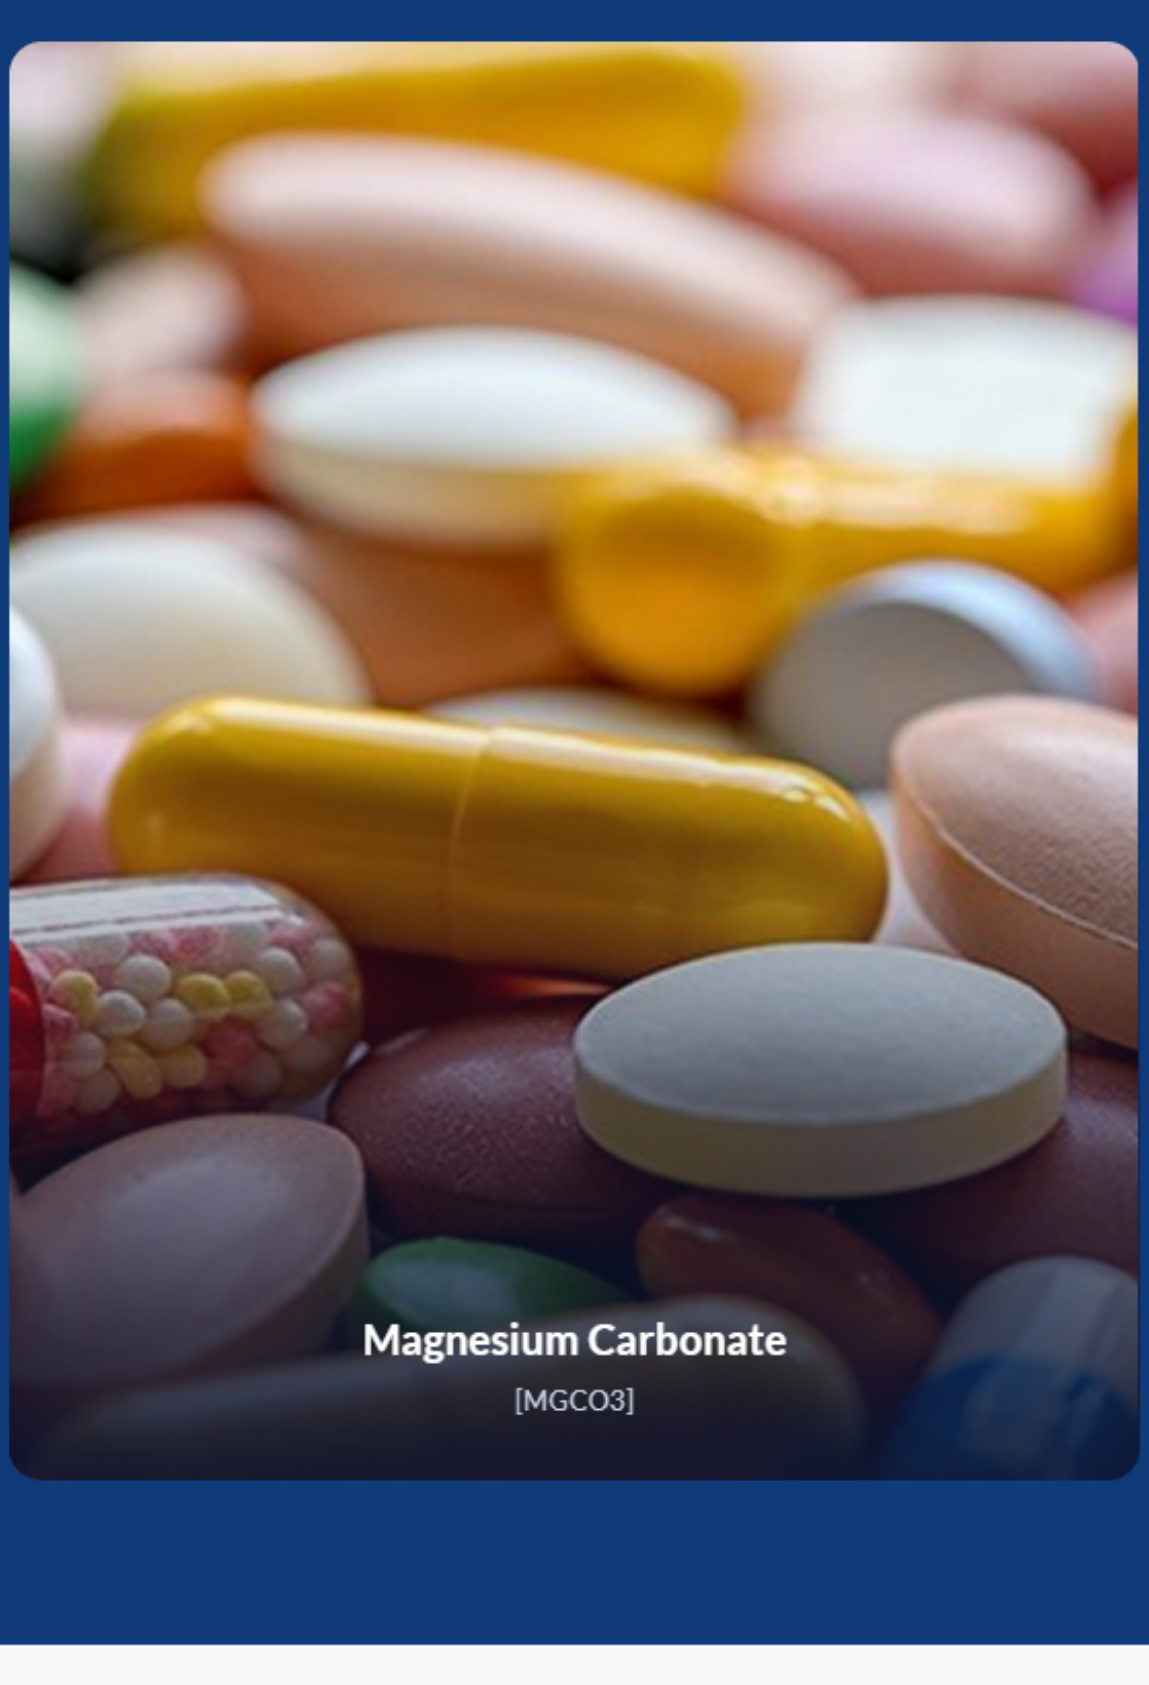
Our key products are featured below.

Our Products Families



Magnesium Hydroxide

[Mg(OH)2]



Magnesium Carbonate

[MGCO3]

Magnesium Oxide

[MgO]

REVIEWS

What do you say about MDCL?

Dive into the feedback from our valued customers and discover why they love our products/services. Read authentic reviews that highlight their experiences, insights, and satisfaction.

Dr. Emily Thompson
Marine Biologist

★★★★★

"The Dead Sea's minerals are incredibly pure, rich in calcium, magnesium, potassium, and bromine. The natural solar evaporation process ensures high quality without heavy metals or animal contamination."

Mark Johnson
Environmental Scientist

★★★★★

"The Dead Sea's unique mineral extraction via solar evaporation is impressive. The process yields high-quality minerals like calcium and magnesium, free from heavy metals and animal contamination."
